Skills

Programming: Python, Java, JavaScript, C

Frontend: React, HTML, CSS, Tailwind CSS

Backend: Django, Django REST Framework, FastAPI, Spring Boot

Database: MongoDB, MySQL, PostgreSQL

Core: Data Structures & Algorithms, DBMS, OOP, Computer Networks, Operating Systems

Projects

Blockchain-Based Pension Management System | *Django, Solidity, Web3.py, Ethereum, MetaMask, JavaScript, Bootstrap* 40 Days

- Developed a blockchain-based pension management system providing secure, transparent, and decentralized pension services.
- Implemented pension application and status tracking using a **Django**-based backend.
- Developed and integrated **Solidity** smart contracts on the **Ethereum Sepolia Testnet** for pension registration, fund deposits, and claims.
- Integrated **Web3.py** and **MetaMask** to enable secure smart-contract interactions and pension fund claims.
- Implemented blockchain event tracking and transaction history to improve transparency of pension-related activities.
- Built a real-time dashboard displaying users, funds, pension claims, and blockchain transaction statistics.

URL-Shortner | *Django REST Framework, React, JWT Authentication, Tailwind CSS, PostgreSQL*

40 Days

- Developed a URL shortening service that converts long URLs into compact, shareable links.
- Implemented **RESTful APIs** for URL creation, redirection, and management.
- Designed backend logic to efficiently map shortened URLs to their original destinations.
- Implemented unique short URL generation and validation to ensure reliable redirection.
- Strengthened understanding of API development, database operations, request handling, and backend architecture.

ShopSphere | *Django REST Framework, React, JWT Authentication, Tailwind CSS, PostgreSQL*

1 Month

- Built a full-stack e-commerce platform using **React**, **Django REST Framework**, and **PostgreSQL**.
- Implemented secure user authentication and authorization with **email-based login** and **JWT**.
- Developed core e-commerce functionality including product management, cart, and user account features.
- Designed and integrated **RESTful APIs** for seamless frontend-backend communication.
- Implemented input validation and error handling to improve API reliability and user experience.

Experience

Automatech

6 Months

Backend Developer

- Developed and maintained backend APIs using **Python** and **FastAPI**.
- Designed and implemented **RESTful APIs** for application features and backend services.

Achievements

- Solved **400+ problems on LeetCode**, demonstrating strong problem-solving and Data Structures & Algorithms skills.
- Secured **1st place overall** in a series of coding assessments conducted by **TAP Academy**.
- Secured a **Top 5 position among 50+ teams** in a hackathon through effective problem-solving, teamwork, and solution development.
- Contributed to **open-source projects on GitHub** through issues, pull requests, and code improvements.

Education

Adichunchanagiri Institute of Technology

2023 – 2027

B.E. in Artificial Intelligence & Machine Learning, CGPA: 7.6

Chikkamagaluru, Karnataka
